

## **TVH Consulting brings years of expertise in distribution markets to Benelux, thus furthering its international expansion**

***'Microsoft Independent Software Vendor of the Year 2010', boasting big-name references like Florette, Overtoom and Pierre Fabre, creates IT-jobs on Benelux erp market***

*Brussels, September 14, 2011 – The French TVH Consulting, an expert in ERP solution consulting, implementation and support, is opening new regional offices in Brussels and Willebroek (Belgium). The new Benelux offices fit in perfectly with the growth strategy of the group, which has subsidiaries in Europe as well as a worldwide partner network. TVH Consulting's reference customers include big-name companies, such as Florette, well-known for the pre-packaged vegetables and salads; Pilot, the global number 2 in pens; the pharmaceutical group Pierre Fabre and mail order company Overtoom (Manutan). By acquiring a majority shareholding in IT services provider Antemas recently, TVH Consulting adds Benelux customers such as Brouwerij Martens, Poppies and Celavita to its portfolio. Committed to making its stamp on the IT landscape, TVH Consulting operates its own R&D center (Paris), employs only senior consultants with industry-specific experience and pursues a future-oriented management policy.*

TVH Consulting was established in 2003 by several seasoned ERP professionals with many years' experience and a shared vision on professionalism, ethics and customer services. Since its incorporation, the group has completed over 500 ERP projects successfully, in Europe as well as worldwide. Its customers, mostly companies with intensive distribution activities, can rely on the expertise of TVH Consulting throughout the entire life cycle of their ERP solution, from the advice and design through to the support phases.

### **"Independent Software Vendor of the Year 2010"**

At the TVH Consulting R&D center in Paris, a team of experts develops industry-specific solutions based on Microsoft Dynamics AX. One result is the successful ADAX©, the first multi-channel ERP solution for distribution companies in the market. It yielded TVH Consulting the Microsoft title 'Independent Software Vendor of the Year 2010' in France.

### **Employee becomes partner**

TVH Consulting currently employs over 100 full-time consultants, all driven by the same ambition: to become a leading IT services provider. To achieve that objective, TVH Consulting has set up a future-oriented organizational structure: employees who demonstrate the right set of management and professional skills, get the prospect of becoming a full partner in the long term and thus actively participate in defining and realizing the group's strategy. Currently, 26% of TVH Consulting shares are

owned by partners and shareholder employees. In the coming months, the company wishes to significantly expand its Benelux team with logistics consultants, solution architects, technical architects and project managers.

### **Strong international scope**

“Our unique, innovative management policy ensures that our people are greatly involved in our projects and customers,” said Guy Tubiana, President of TVH Consulting. “All of us understand very well how crucial it is for companies to rely on an ERP solution that seamlessly meets their business-specific needs, their strategy and the corporate culture. Dialogue, deliberation and cooperation are keywords in that regard. Hence also our international scope: by setting up local offices and teams, we ensure that TVH Consulting is always nearby, which fosters a human approach. The new facilities in Brussels and Willebroek will doubtlessly bring us closer to our Belgian customers.”

### **About TVH Consulting**

Established in 2003, TVH Consulting is an independent services provider that specializes in consulting, implementation and support for IT solutions based on the technology of the world's leading ERP suppliers. The group employs over 100 IT consultants who, between them, generated EUR 13 million in turnover in 2010. TVH Consulting operates its own R&D center close to Paris and develops vertical solutions for companies active in specialized distribution, multi-channel distribution and the food industry and for large-scale distribution suppliers. The group is mainly active in Europe but also boasts an extensive partner network that supports its activities in the rest of the world (United States, Canada, South Africa, etc.).
